

ECT424&IS324 Assignment Three: WordPress Site

Assignment: Due class five, Total points: 10

1. Develop a site taxonomy
 - a. Using your context as a guide develop a top level list of at least 5 categories
 - i. Develop a second level of topics for one top level topic [at least 5 subcategories]
 - b. Develop a list of tags appropriate to your context (these don't need to be created yet, about 5).
2. Create ALL categories and subcategories on your site. You should try to create at least 10 categories/sub-categories on your site.
3. DO NOT change the name of the Uncategorized category. There are several plugins that require this category.
4. **Post a document to D2L** with your taxonomy in it

Example

If my site is about travel to Israel for Pilgrims, I might have categories such as:

Lodging in Haifa (top level category)
Hotels on top (sub-category)
Hotels at bottom
Private rooms
Currency (top level category)
Conversions (sub-category)
Costs
Food
Pilgrim House
Restaurants
Timelines
Before
During
Travel around Israel
Automobile
Dead Sea
Jerusalem
Tel Aviv

Tags associated with a specific article about food at the Pilgrim House might include: cooler, grocer, utensils, fresh food
